

To whom it may concern,

Hereby we, Sanquin Reagents, declare that none of the manufactured bloodtyping reagents contain any substance or preparation which requires a Safety Data Sheet (SDS) according directive 1999/45/EC.

Concerning the manufactured immune reagents the following products contain substances or preparations which require a SDS (these SDS are separately available on request):

- Pelikine ELISA kits, 96 tests: M1904, M1906, M1920, M1921
- Pelikine Toolset; M1980
- PeliClass ELISA for human IgG subclass quantification: M1551
- IgM rheumatoid factor ELISA kit: M1950

All other immune reagents which are manufactured do not contain any substance or preparation which requires a SDS according directive 1999/45/EC.
